Introduction/WELCOME

Welcome!

Thank you for your willingness to participate in the Nebraska Department of Education program approval review process for the University of Nebraska Kearney Educator Preparation Programs (UNK EPPs). The Rule 20 and Rule 24 Folios report information and data for the academic years 2013-14 and 2014-15 (as per permission from NDE and CAEP). Documentation is provided in the form of assessment data, handbooks, catalogs, advising sheets, etc.

Thank you for your time and insight,

Sheryl R. Crow, Ph.D.
Associate Dean and Accreditation Officer
University of Nebraska
College of Education

Directions for Navigating

✓ **Organization:** This document page provides narrative, data, data analysis, and supporting documentation for the University of Nebraska Kearney Rule 24 Folio for the Special Education Generalist Endorsement Program. The folio is a single PDF document that may be accessed with Adobe Reader. If you do not have Adobe Acrobat Reader, please follow this link to upload it: [https://get.adobe.com/reader/](https://get.adobe.com/reader/). When opening the file, a bookmarks navigation panel should appear to the left of the document. This panel lists the headings corresponding to specific components of the Folio. If the panel is not visible, please click on View in the top menu > Show/Hide > Navigation Panes > Bookmarks. This will expose the bookmark panel. Some resources are hyperlinked within the document. Clicking on a hyperlink (blue underlined) will open a web page.

✓ Links to UNK’s Course Catalogs: Should reviewers need to reference UNK Course Catalogs, please use this link to access current and previous undergraduate and graduate course catalogs.

Support

Should you encounter difficulties with accessing any documents, please contact Sheryl Crow at 308-224-1552 or Brian Wojcik at 309-261-2158.

The UNK STFE is based on a 4-point scale using the following terms: (1) Beginning, (2) Progressing, (3) Proficient, and (4) Advanced. Key indicators on the address this area. They include: (1.1) Demonstrates Knowledge of Subject Matter; (1.2) Objectives are linked to standards; (3.3) Links new concepts to previous knowledge; and (3.4) Seeks out multiple resources for teaching to meet the range of individual needs.</td>

<td>Teacher Candidate Project</td>
<td>During the first month of the student teaching experience (TE 400), education majors complete the Case Study of a Classroom common assessment. This task will involve a thoughtful and detailed analysis of the PreK-12 students that the education major is responsible for teaching. Key learning factors that are to be considered include diversity and academic ability (especially including consideration of identified exceptionalities) with the identification of strategies for differentiating instruction. In addition, the task will require consideration of the physical layout of the classroom—especially including the extent to which technology can be utilized in the teaching/learning process. A scoring rubric is used to assess Teacher Candidate performance. The rubric includes four indicators that are assessed on a 4-point scale: 1(Beginning), 2 (Progressing), 3 (Proficient), 4 (Advanced) with a score of 3 or 4 considered as meeting expected level of performance on the specific indicator. A total score of 11 is needed to meet expected level of proficiency on the assessment. This is evaluated by the UNK Student Teaching Supervisor.</td>

<td>NDE Survey</td>
<td>The Nebraska Department of Education (NDE) administered the Nebraska First Year Teacher Survey from May to June 2015 which served as the first year of its full rollout. Surveys were distributed to the principals of first year teachers who completed their preparation programs at UNK. Respondents were asked to rate the extent to which the first year teacher was effectively prepared for their school assignment on various indicators. These indicators were based on the degree to which the teacher meets the expectations: Consistent, Frequent, Occasional, or Rare. Respondents were also asked if they considered the teacher effectively prepared for continuing employment in their districts and to provide comments “which can inform the institution’s continuing improvement efforts toward preparing classroom-ready teachers.” Evaluation indicators are based on the Council of Chief State School Officers (CCSSO) Interstate Teacher Assessment and Support Consortium (InTASC) Model Core Teaching Standards, 2011.</td>

**General Notes:** Assessments 2-7 contain both Baccalaureate and Post-Baccalaureate Data. GPA data represent program completers during the corresponding academic year. Praxis data represent those individuals who completed the praxis subject area test during the corresponding academic year. Key assessments 2-6 are representative of teacher candidate performance data collected during the corresponding academic year. First Year Teacher Survey was sent to the principals of those candidates who received their initial teaching certificate in 2013-2014 or 2014-2015, and were teaching in Nebraska for the first time during the 2014-2015 school year. Survey data represent Baccalaureate, Post-Baccalaureate, Alternative Route, and/or Master's Level data for the endorsement. It is important to note that the data presented in each academic year are influenced by program completers seeking multiple endorsement areas which may impact the academic year the teacher candidate becomes a program completer.

**Endorsement Program Specific Notes:** The Praxis Data represent a mean combine score for both Special Education K-6 and Special Education 7-12 Endorsement Areas as both endorsements take the same subject area exam. Artifact 3: Interpretation and Summary of Assessment Data

GPA and Praxis Data

Content knowledge, in part, was measured through a combination of GPA data and teacher candidate performance on the Praxis Subject Area Assessment specific to the endorsement area. GPA data for both academic years indicate that program completers met, and in most cases, exceeded the minimum GPA of 2.75 within the baccalaureate, post baccalaureate, and/or alternate route pathways. The mean Praxis Subject Area Assessment score is 165.43 (range 135 – 190). This would seem to indicate that there are percentage of program completers who demonstrate difficulty successfully passing the subject area assessment. As there is only one year of data for the subject area assessment and the data reflect the first year in which the subject area assessment was required, it is difficult to ascertain whether or not these data are both valid and reliable in describing program completer content knowledge over time. Praxis Subject Area Assessment data at other levels (e.g., post baccalaureate and alternate pathway) are masked due to low exam completion rates (i.e., n ≤ 5). Overall, both of GPA data and the Praxis Subject Area Assessment data indicate that most program completers have average or above average content knowledge.

Content Knowledge

The second key assessment focusing on content knowledge is assessed through sub scores within the Student Teaching Final Evaluation. Specifically, the scores reflect items related to knowledge of subject matter, linking objectives to standards, linking new concepts to previous knowledge, and seeking multiple resources for teaching content. For both academic years reviewed, teacher candidates met or exceeded the criteria for these items. Looking historically at the data, teacher candidates’ average scores on these items have varied but so has the number of teacher candidates who student taught. This creates some inconsistency when comparing the data across years. That being said, with few exceptions, teacher candidates have consistently met or exceeded the performance expectations with regard to content knowledge as assessed by the Student Teaching Final Evaluation. Generally, a positive trend toward improved scores has been noted over the last five years.

Learner and Learning Environments

The third key assessment, which focuses on the learner and learning environments, is assessed by the Case Study of the Classroom project which occurs during student teaching. Looking historically, the individual scores for this project have either met or exceeded expectations. Teacher candidates’ performance on this project have been trending upward over the past five years.

Instructional Practices – Knowledge

Knowledge of instructional practices is assessed as part of the Student Teaching Final Evaluation. Specifically, items relating to (a) lesson planning for assessment and evaluation; (b) instructional planning and materials/resources management; and (c) instructional delivery and classroom management comprise the average scores noted in this section. Overall, teacher candidates consistently met (average of 5/6 teacher candidates) or exceeded (average 1/6 teacher candidates) the expectations in this area with no exceptions. Teacher candidates demonstrate relative strengths and performance in the following areas: using assessment results to adjust and plan future lessons, seeking
out multiple resources for planning instruction to meet a range of learner needs, engaging students in meaningful activities, showing enthusiasm when teaching, creating a positive classroom environment, completion of noninstructional activities, and developing appropriate relationships with students. Despite meeting or exceeding the expectations, a few areas were identified as areas in which teacher candidates demonstrated relative difficulties: managing time and materials, questioning strategies, incorporating cultural backgrounds and interests of the students when planning, infusing appropriate technologies during instruction, and making assessment criteria clear to the students.

**Instructional Practices – Effectiveness**

The effectiveness of instructional practices is assessed as part of the Case Study of the Unit Plan project which occurs during student teaching. As part of this project, teacher candidates are expected to devise an assessment strategy to determine the degree to which the students whom they are teaching have responded to the instruction during a unit. Teacher candidates are expected to use data to alter their instruction in response to student performance and, upon completion of the unit, reflect on the degree to which the instruction was effective. Overall, teacher candidates demonstrated performance that met or exceeded the expectations within this area. In fact, when compared to performance data related to other aspects of this project, evaluation of learning was an outstanding strength.

**Professional Responsibility**

Professional responsibility is assessed during student teaching through the Student Teaching Final Evaluation. The aspects of the Student Teaching Final Evaluation that are used to assess professional responsibility include collaboration, reflection, and responsibility. Data analyses reveal that teacher candidates met (average of 2 out of 6 teacher candidates) or exceeded (average of 4 out of 6 teacher candidates) the expectations within these areas. Data indicate that teacher candidates scored lower in the area of self reflection than in other areas. However, it is important to note, that teacher candidates still met, on average, the expectations for this area.

**Overall Proficiency**

Overall proficiency is assessed through the Nebraska Department of Education Follow-Up Teacher Survey. The composite average score across all items contained within the survey serves as a proxy measure of the perceived overall proficiency of program completers by their employers. Data are only available, at the time of this analysis, for program completers from the 2013 – 2014 academic year. The returned data yielded an overall proficiency rating of 2.39 out of 3. This would indicate that program completers frequently to consistently met the overall proficiency expectations of their employers. Relative perceived strengths include understanding learner differences understanding learner difference, creating conducive learning environments, engaging in professional learning and ethical practice, in analyzing the impact of instruction on student learning and development. Employers perceived content knowledge and assessment of content as well as instructional strategies related to particular content to be areas of relative difficulty.
Section 3: Use of Related Data and Information for Continuous Program Improvement of Endorsement Program

The 7-12 special education generalist endorsement program has undergone a number of changes within the last seven years. Due to changes in state rules regarding endorsements, courses were changed and content was updated to align with the new rules. In addition, during the summer of 2014, stakeholders from across the state of Nebraska were brought together to provide feedback on the endorsement program. The stakeholders included recent program completers, program completers of five or more years, cooperating teachers, and school special education administrators. Overall, the feedback from the stakeholders regarding the quality of preparation of teacher candidates by endorsement program was positive. Stakeholders recommended several key areas to refine within the program including ensuring that teacher candidates understand mental health issues and strengthening instructional strategies related to key functional domains (e.g., reading, writing, and math). It is important to note that content knowledge is also indicated as a relative difficult area within other data sources (e.g., NDE Follow Up Survey). In response to the recommendations, course content in several courses have been modified and increased credit hours have been devoted to courses that focus specifically on these areas. Decisions made regarding program changes have been made jointly by the program faculty in collaboration with the Chair of the Teacher Education Department. Furthermore, the special education program team has begun to meet monthly to continually review data and make changes to improve the outcomes of the endorsement program.

As part of periodic program review and in conjunction with the process of CAEP accreditation, the UNK College of Education has led efforts to increase the rigor of the common assignments across endorsement programs at UNK as well as the reliability and validity of the assessments corresponding to those assignments. Through cross campus efforts, members of multiple endorsement programs reviewed, discussed, and evaluated different validated frameworks and instruments focused on improving the quality of teachers. Through a joint decision, the Charlotte Danielson Framework for Teaching was selected as the underlying conceptual framework for the development of common key assignments that would be assessed across endorsement programs. The corresponding validated rubric of the Charlotte Danielson Framework for Teaching was selected as a valid assessment instrument for the newly constructed assignments. The Charlotte Danielson framework for teaching was supplemented and modified slightly to incorporate essential concepts related to technological pedagogy (via the ISTE Standards for Teachers) and student engagement (utilizing the SCORE Model by Strong, Silver, & Robinson, 1995). An assignment focused on lesson planning, implementation of the lesson plan, and reflection on the implementation of the lesson plan was developed. In addition, an assignment focused on unit planning, implementation of the unit and, and reflection on the implementation of the unit plan was also developed. The two newly developed assignments focus deeper on multiple aspects of instructional design, implementation of instruction, and reflection to improve teaching practices. Across endorsement programs, these assignments and corresponding assessments will be conducted a minimum of two times prior to graduation. This will allow endorsement programs to assess and evaluate teacher candidate growth during the educator preparation program.

Furthermore, while UNK has had a strong emphasis on developing educator dispositions, further changes have been underway in this area as well. Again, through cross campus efforts
led by the UNK College of Education, multiple endorsement program representatives reviewed options for increasing the rigor of expectations regarding educator dispositions across the endorsement programs as well as the validity and reliability of the corresponding assessment. The *Educator Disposition Assessment* (Almerico, Johnston, & Wilson, 2015) was selected as both the framework and assessment for dispositions across endorsement programs. The framework will be introduced early within teacher candidates’ preparation programs. Dispositions will be assessed, in part, at least once prior to admission to teacher education and an additional two times prior to program completion. Similar to the multiple assessment points of the lesson plan and unit plan, this will allow endorsement programs to assess and evaluate teacher candidate growth with regard to dispositions over the course of the educator preparation program.

Stakeholder feedback from program completers, cooperating teachers, school administrators, supervising clinical faculty, and program faculty regarding the program changes. Stakeholders provided positive feedback on the proposed changes and validated the necessity of the changes. They also provided input on changes to the gateways for the educator preparation programs with regard to GPA requirements, service learning requirements, and course requirements. These recommendations are being considered by the College of Education and endorsement programs.

It is the hope that, by having multiple assessment points, the teacher candidates will have increased feedback on their performance related to these vital areas and opportunities to reflect and respond to the feedback as well as make changes for improvement. It is the hope that the educator preparation program will be better positioned to support teacher candidates in targeting specific areas for growth and providing scaffolds to facilitate the growth.

APPENDIX B - Program/Endorsement Assessment Instruments and Scoring Rubrics
Case Study of a Classroom Common Assessment
UNK Teacher Education Program

Assignment Purposes

1. To encourage teacher candidates to gather relevant data that is specific to their student teaching placement.
   a. Data gathered will allow teacher candidates to explore how the context in the classroom links with the larger “surrounds” of the school and the community.

2. To encourage teacher candidates to identify key issues to be considered in their instructional planning.
   a. Teacher candidates will reflect about the instructional implications of this new-found knowledge.
   b. Contextual knowledge of the community, school, and classroom will enhance the teacher candidate's potential for teaching effectively.

3. To enhance teacher candidates’ potential for effectively teaching groups of students and also for teaching individual students within groups.
   a. Knowledge gained will be applied during the semester as they modify instruction in order to meet the needs of individual and groups of learners

4. Desired Outcomes for Graduates Addressed: K-b, K-c, K-d, D-b, D-c
   a. As described in the University of Nebraska at Kearney “10 Desired Outcomes”

Guidelines

1. During student teaching, all teacher candidates will complete the Case Study of a Classroom common assessment for each endorsement. (K-12 endorsements are considered to be one endorsement although there might be two placements, one for elementary and one for secondary. One Case Study is required.)

2. The assessment will be done at the beginning of each placement; if the second placement is in the same district, much of Component 1 can be cut and pasted into the second Case Study of a Classroom. Items 19-24 should definitely be new information based on the second placement.

3. The Case Study of a Classroom is due on Friday of the 4th week of each placement.

4. The university supervisor will be responsible for assessing both Case Studies of a Classroom.

5. The minimum score for the Case Study of a Classroom is 15 points (the maximum score is 20 pts.).

5. If a teacher candidate does not achieve the minimum score, the university supervisor, working in collaboration with the teacher candidate, will create a remediation plan.
   a. The original copy of the remediation plan will be placed on file in the Educator Certification Office.
b. Teacher candidates will receive an “incomplete” grade in the course if the remediation plan is not successfully completed (one year to remove an incomplete grade).
COMPONENT #1: Gathering the Data

Community Data

(1) List the community’s major employers/dominant businesses and industries:

(2) Classify the setting; it is predominately:
   ___ rural
   ___ urban
   ___ suburban

(3) Racial/ethnic composition of the community: List appropriate percentages for the following groups:
   Caucasian ______ Native American_____ Hispanic/Latino____
   Asian_______ African American/Black_____ Other_____

(4) List the languages spoken in the community:

(5) List resources/programs in the community that might help/support the school:

School Data

Review the NDE Report Card Website for your school.
List key insights for the following components of the NDE Report Card:

(6) District information:

(7) Federal Accountability:
(8) Reading Performance:

(9) Writing Performance:

(10) National Student Performance:

(11) Student Characteristics (must include ethnic diversity, mobility rate and socioeconomic data):

(12) Teachers:

(13) Schools in the District:

(14) List key features of the school facility (age of building, general features, etc.):

(15) List the technology hardware and software that is available in the school:

(16) List the special programs in the school that are designed to insure that the needs of ALL students are met (i.e., migrant programs, ESL programs, food-related programs, Title I, etc.):

(17) List programs/processes that facilitate parental involvement in the school:
List the extra-curricular activities that are available to the students:

**Classroom Data**

List key developmental characteristics of the typical learner in your assigned classroom:
- Physical:
- Emotional:
- Social:
- Language:
- Cognitive:

Anonymously list the qualifying exceptionalities for all the atypical learners in your classroom:
- Physical:
- Emotional:
- Social:
- Language:
- Cognitive:

List the diversity present within the classroom (ethnicity and SES {socioeconomic status} are required):

List the technology present within the classroom (hardware and software):

List key features of the Classroom Management and Organization Plan:

List key components of the instructional plan for the classroom (Most frequently used strategies, special teaching materials, programs, etc.):

**COMPONENT #2: Reflective Summary**

(Maximum length is three (3) typed pages, double-spaced, with size 12 font. Please complete this on separate pages.)
1. Identify three unique subgroups or individuals that you will be working with in this placement. To identify these individuals/groups, reflect on the data from Component 1 and research at least two other sources; these might include the student’s cumulative file, test scores, teacher anecdotes, SAT (Student Advisory Team) documents, IEP (Individual Education Plan), RTI (Response to Intervention) documents, LAS test scores (Language Acquisition Skills), etc. Describe the characteristics/needs of these groups/individuals. Include the specific information you found from looking at the data.

   Examples of subgroups/individuals: ELL, resource students, speech students, high ability leaners, free and reduced lunch candidates, mobility, behavior (ADHD, autistic), visually impaired, severe/profound disabilities, physical disability

   Examples of characteristics/needs: A student with autism may have difficulty focusing or working with others. Previous teachers have noted the need for eliminating distractions as much as possible (data)

   (Advanced: He may require one-on-one instructions.)
2. Describe at least one appropriate strategy to differentiate instruction for each subgroup/individual identified in Question 1, and explain how it will impact the learning of each one.

Examples of strategies: modified classroom/daily schedule, behavior plan with consequences, use of an IEP, special seating, use of technology to address a specific disability, group work, visual displays, books on tape, modified assignments
Example: A paraeducator could be assigned to work with a student with autism following a specific classroom schedule which allows the para and the student to be in the classroom for a designated amount of time. (Advanced: This strategy provides one-on-one interaction within a whole group activity so that the student with autism is able to participate in classroom instruction; this results in increased academic performance and socialization with peers.)

3. Reflect about the impact this assignment has on your own teaching. Some issues to consider may include but need not be limited to:

What special adaptations will be necessary to ensure success for every student in your classroom? What are some ways to establish student-teacher relationships which will help to cultivate a positive learning environment for all students? How will differentiated instruction look in your classroom?

*Scored by University Supervisor*
Directions: The teacher candidate will plan, write and teach a ten day unit. The teaching unit will include all components listed below.

Assignment Purposes

1. To promote student learning
   a. Teacher candidates will show how student learning occurs and how to use instructional strategies that promote learning for all students.

1. To enhance short-term and long-term planning
   a. Teacher candidates will gain a better understanding of learning theory, curriculum development and student development, and how to use this knowledge in planning instruction to meet curricular goals.

2. To develop and expand instructional strategies
   a. Teacher candidates will understand and know how to use a variety of instructional strategies to encourage critical thinking, problem solving, and various physical and/or mental abilities.

3. To understand appropriate assessment
   a. Teacher candidates will become more effective in planning for various types of formal and informal student assessments, including pre-test and post-test.
   b. Teacher candidates will become more effective in evaluating data to make decisions about differentiated instruction

4. UNK 10 Desired Outcomes Met: K-a, K-b, K-c, K-d, S-a, S-b, S-c, D-a, D-b, D-c

Unit Plan Components

1. Unit Plan Topic:

1. Teaching Rationale:
   a. Why are you teaching this unit?
   b. How will you approach this unit, and what will be your focus?

2. A written outline of the sequence of events for a minimum of 10 teaching days (5 days if block schedule, everyday) including calendar dates.
   a. Teaching unit will “fit” into the scheduled curriculum of the classroom, but will give the teacher candidate the opportunity to be creative and “shine” during this teaching experience.
b. The cooperating teacher, with the approval of the university supervisor, can make adjustments to the length of the unit.

3. **Daily lesson plans:**

   1. **Objectives/Learner Outcomes for the Learners**
      
         a. Aligned with appropriate standards, school improvement goals, or IEP goals
         
         b. Developmentally appropriate based on level of development and student experience

   2. **Assessment Strategies and Evaluation of Learning**
      
         a. Including pre-assessment, formative assessment, and post-assessment
         
         b. Both formal and informal assessment strategies
         
         c. Consideration for giving student feedback, report cards, conferences, etc.
         
         d. Assessment is consistent with teaching methodology
         
         e. Provide evidence of analysis of assessment data to determine success of all P-12 learners

   3. **Instructional Sequence and Activities**
      
         a. Uses an appropriate lesson plan format (i.e. Hunter, discovery learning, etc.)
         
         b. Activities are well-planned and linked to objectives
         
         c. Active involvement of students
         
         d. Use of multiple instructional strategies (Universal Design for Learning)
         
         e. Questioning strategies to promote higher level thinking
         
         f. Differentiations made for special needs and cultural considerations are explicitly listed by need
         
         g. Instructional activities are based on or adjusted according to pre- and/or post-assessment data

   4. **Management of Materials, Resources, Technology**
      
         a. Materials/resources are appropriate for the learning objectives
         
         b. Appropriate use of technology when possible and when it enhances the learning of all students
         
         c. Effective management of materials and time

   5. **Ongoing Analysis and Reflection**
      
         a. Daily monitoring of student performance to adjust teaching
         
         b. Identification of areas that may need to be re-taught
         
         c. Self-analysis of teacher performance (completed after unit is taught)
         
         d. Recommendations for future learning
Due Dates and Assessment

1. The Case Study of a Unit Plan is to be completed by the end of each endorsement's placement period.

1. The rubric for scoring the Case Study of a Unit Plan is blue.
   a. Student teaching experience is a time of practice. Expectations for an experienced teacher are not required.
   b. Successful teacher candidates should perform at the proficient level.

2. Teacher candidates must score a minimum of 18 points on the total assessment of the Case Study of a Unit Plan.
   a. Maximum score on rubric is 24 points.

3. The graded unit plan will be shared with the University Supervisor.

4. If a student does not earn a minimum score of 18, he/she must complete a remediation plan which focuses on the traits not deemed proficient. This may involve extending the placement time or making other arrangements to demonstrate proficiency (rewriting and/or reteaching) before credit can be given.

Students are strongly encouraged to use the daily lesson plan templates on TaskStream and then create the unit plan using the Unit Builder on TaskStream.

STUDENT TEACHING FINAL EVALUATION

FINAL EVALUATION
At the end of the student teaching experience, both the cooperating teacher(s) and the university supervisor(s) will assess the teacher candidate’s performance by completing a copy of the evaluation form, using the rubric in the Student Teaching Handbook (same as used for the midterm). During the final conference, the teacher candidate should have a clear picture of his or her strengths and areas for continued growth. It can also be a time to discuss the type of position for which the teacher candidate is best suited. The teacher candidate should sign and receive a copy of the final evaluation from both the cooperating teacher and the university supervisor. A copy of this final evaluation will be placed in the teacher candidate’s permanent Teacher Education file. Teacher candidates should keep copies for themselves as well. A composite final evaluation will be entered on TaskStream; teacher candidates should print off a copy for their records.

WRITTEN RECOMMENDATION FOR TEACHER CANDIDATES
If the teacher candidate asks you to write a recommendation for his/her Credential File, it is the student’s responsibility to provide you with the proper form and an addressed, stamped envelope.

Nebraska First Year Teacher Survey

This survey is designed to provide Nebraska educator preparation institutions with information about the effectiveness of teachers prepared by their institution. The indicators used in this survey are adapted from the INTASC standards which are nationally recognized as indicators of teacher quality. These standards are also consistent with the evaluation used for these individuals during their clinical experience and with the Nebraska Teacher Frameworks.

Your responses to this survey will not be shared with individual teachers and data will be provided to institutions on an aggregated basis.

There are 17 questions in this survey
