It was easy for Ogallala High School graduate Patrick Moore to choose UNK. “I liked the size and had family who were alumni.” Moore chose a comprehensive biology major because he wanted to go into medicine and graduated in 1991.

“What I liked most about the biology department is the professors knew you personally,” Dr. Moore said.

In 1999, the podiatrist opened his own practice, Moore Foot and Ankle Clinic in Kearney, and now treats foot and ankle issues of his patients. He credits his success in his career to his experience at UNK.

“The interactions in the classroom and campus would help me succeed in any career, but currently allow better communication with patients, which is critical in their healthcare.”

Podiatrists provide medical and surgical care for people suffering foot, ankle and lower leg problems. They diagnose illnesses, treat injuries and perform surgery. Podiatrists treat calluses, ingrown toenails, heel spurs and arch problems. They also treat foot and leg problems associated with diabetes and other diseases.

Responsibilities of a podiatrist:
- Examines patients’ feet, ankles and lower legs
- Diagnoses ailments such as ingrown toenails, arch problems or fractures
- Recommends X-rays and lab tests before identifying a particular ailment
- Prescribes medications
- Performs surgical procedures
- Carries out administrative duties
- Prescribes orthotics for arch problems

Advantages that UNK has to offer health science students:
- Smaller class size
- Low student-to-faculty ratio
- Laboratory experiences
- Opportunities for student research
- Strong science preparation
- Academic advising
- Mentoring
- Contact with local professionals
- Extensive health careers course
- Health science seminar course
- Application process assistance
- Shadowing programs
- Health Science Club
- Health Careers Fair

Podiatrists are specially trained and have greater expertise than physicians in that area of practice.

**ALUMNI PROFILE – Brandon Borer, D.P.M.**

“At UNK, I really got the impression professors cared about my future plans and did the best to prepare me for what was ahead,” said Brandon Borer from Petersburg, Neb. “The smaller class sizes allowed more interaction with the instructors in a nurturing environment where I was able to develop the study skills needed to achieve at a higher level.”

The 2008 UNK graduate chose the Bachelor of Science health science major to prepare for podiatry school coursework and is now a podiatrist at Columbus Orthopedics and Sports Medicine in Columbus, Neb., where he diagnoses and treats conditions of the foot and ankle.

**Health Science Club**

**Members in Health Science Club would love to have you join!**

- Be sure to check your LoperMail for the weekly edition of the Health Science Weekly newsletter that will include information on upcoming activities.
- Interested students can also Like UNK Health Sciences on Facebook to learn more about the organization.

---

**Did you know?**

More than 700 students are enrolled in Health Science programs at UNK.

That means, one of 10 Loper students are interested in health-related careers.

UNK has an excellent record helping health science students gain acceptance into professional schools or clinical programs.

For more than a decade, the overall acceptance rate of UNK students into various health programs has been approximately 70 percent.

Job shadowing leads to employment according to the U.S. Department of Labor.

Not only will you benefit from the on-the-job training and gain insight into a particular career, industry, or company, but you will also be mentored.
