Privacy Matters in Firefox Series
Private Browsing -- Mac

This feature does exactly what it says. Turn it on to keep your browsing history private from others who use the same computer.

**Turn on Private Browsing for Mac users?**

1. In your Firefox Menu bar, click on **Tools > Start Private Browsing**.

2. When you turn on Private Browsing, Firefox alerts with a message. If you don't want to receive this alert when you turn on Private Browsing, check the box next to "Do not show this message again".

3. The Private Browsing information screen appears to confirm that you're in Private Browsing mode.
**Turn off Private Browsing?**

1. In your Firefox Menu bar, click on **Tools > Stop Private Browsing**.

2. The windows and tabs you were using when you enabled Private Browsing will appear, and you can use Firefox normally.

**Always start Firefox in Private Browsing?**

There is a setting in the Preferences window that automatically enables Private Browsing whenever you start Firefox.

1. In your Firefox menu bar, click **Firefox > Preferences**.

2. In the open dialog box, select the **Privacy** panel, and in the History section, select **Use custom settings for history**.
3. Check the box next to **Always use private browsing mode.**
