What is QUALY BROWSERCHECK?

Qualys BrowserCheck is a cross-platform and cross-browser service that scans the user's browsers looking for vulnerabilities in the browser itself and its plug-ins. This tool will also help you fix the security issues discovered by the scan.

Why is my browser insecure?

Your browser could be considered insecure for multiple reasons. Your browser installation could contain a software issue that makes it vulnerable to malicious activity. You could also be running an outdated version of the browser or its plugins.

Please note that Qualys BrowserCheck Plugin does NOT use or track your personal information and browser history.

Instructions to scan your browser for vulnerability

1. Click on the following link to install and scan your browsers
   a. browsercheck.qualys.com

2. The first time you click on the above link, you will see the following window. Click on the Install Plugin button and follow the on screen instructions to install the Qualy Browsercheck.
3. We recommend that you scan your browser regularly to stay up to date with the latest browser versions and plugins. Go back to browsercheck.qualys.com and create a bookmark to regularly check all of your browsers in one place by simply clicking on your bookmark.
