What is Qualtrics?
Qualtrics is a private research software company that enables users to do online data collection and analysis. The Qualtrics Research Suite is a good choice for academic organizations. It allows organizations to perform sophisticated research in house, reducing the need to outsource to specialized firms.

Every UNK faculty, staff, and student has a Qualtrics UNK account.

Instructions to login to Qualtrics at UNK:
1. From the UNK home page select the button > Enter your user ID and EASI password > Sign-In > Qualtrics.
   - Your user ID is the part that appears before the @ in your email address.
   - For example, if your email address is loperl@unk.edu then loperl is your user ID.
2. Your EASI password is the password that you use to access your UNK email or Blackboard.

Qualtrics Help
1. Online Training Program.
2. Register for the ITG Qualtrics workshops by clicking on this link.
