iWork is Apple’s productivity software suite, which includes Keynote (presentation), Numbers (spreadsheets), and Pages (word processing). The new iWork for iPad suite takes advantage of the iPad’s touch screen input; for example, slides in Keynote, columns in Numbers, and text and graphics in Pages can be rearranged by tapping and dragging your finger.

To learn more join us for one of our workshop on Keynotes, Pages, and/or Numbers. Click here for the list of the workshops and registrations.
