Finder Tabs, One Window, Multiple Tabs

The Finder app is used to add, delete, move, group, sort and view files and folders on your Mac and any external drives you have attached.

To open a new Finder window right mouse click (CTR, Click) on the Finder > New Finder Window.

Too many windows in your way?
After you open a few Finder windows, you will have too many windows in your way. Declutter your desktop by merging all your Finder windows.

Select the Window > Merge All Windows. The best advantage about merging the windows is that each time you open your Finder you will have your specific folders already open.

Get organized
Need to move something? Just drag it from one tab and drop it on another.
