

Chiropractors treat patients with health problems of the musculoskeletal system, which is made up of bones, muscles, ligaments, and tendons. They use spinal manipulation and other techniques to treat patients' ailments, such as back or neck pain. Chiropractors typically do the following:

- Assess a patient's medical condition by reviewing his or her medical history, listening to the patient's concerns, and performing a physical examination
- Analyze the patient's posture and spine
- Provide musculoskeletal therapy, which involves adjusting a patient's spinal column and other joints by hand
- Conduct additional diagnostic tests, including evaluating a patient's posture or taking x rays
- Provide additional treatments, such as applying heat or cold to a patient's injured areas
- Advise patients on health and lifestyle issues, such as exercise and sleep habits
- Refer patients to other medical specialists if needed

Chiropractors focus on patients' overall health. Many believe that misalignments of the spinal joints interfere with a person's nervous system and can result in lower resistance to disease and many different conditions of diminished health. Some chiropractors use additional procedures, such as acupuncture, massage therapy, and ultrasound. They also may apply supports, such as straps, tape, braces, or shoe inserts, to treat patients and alleviate pain. In addition to operating a general chiropractic practice, some chiropractors specialize in sports injuries, neurology, orthopedics, pediatrics, nutrition, internal disorders, or diagnostic imaging. Chiropractors in private practice are responsible for developing a patient base, hiring employees, and keeping records. (*Occupational Outlook Handbook*)

A minimum of 90 semester hours is required for admission to most chiropractic colleges. However, students pursuing these programs are expected to choose a major so that he/she can be working towards a baccalaureate degree concurrently with the pre-chiropractic program. This requires a major/minor combination or a comprehensive major as well as completion of the UNK general studies requirements and other degree requirements as set forth in the college catalog. These programs do not specify which major a student should pursue in conjunction with his/her pre-chiropractic studies. **Gaining acceptance into a chiropractic school is a very competitive process. Completion of the pre-requisite courses does not automatically guarantee admission.** The following curriculum is the recommended course of study for pre-chiropractic students. However, chiropractic schools do allow some flexibility in required courses. Therefore, students should check with the specific school(s) to which they intend to apply to ensure that all requirements are met and see their pre-chiropractic advisor for course planning.

Choose one of the following options:

Take these 2 courses:

BIOL 103	General Biology	4
BIOL 215	Human Physiology	4

OR take these 2 courses:

BIOL 225	Anatomy and Physiology	4
BIOL 226	Anatomy and Physiology	4

Take all of the following:

CHEM 160	General Chemistry	4
CHEM 161	General Chemistry	4
CHEM 360	Organic Chemistry	5
CHEM 361	Organic Chemistry	5
ENG 101	Introduction to Academic Writing	3
ENG 102	Academic Writing and Research	3
PHYS 205	General Physics	5 (be aware of prerequisites
PHYS 206	General Physics	5 for all courses)
PSY 203	General Psychology	3
SOC 100	Introduction to Sociology	3
MATH 102	College Algebra	3

Electives:

Take 15 hours of electives from the Humanities and Social Sciences:

Recommended courses in the humanities and social sciences include English literature courses, foreign language, psychology, philosophy, political science, economics, sociology and fine arts courses.

Academic Guidelines

A minimum cumulative Grade Point Average (GPA) of 3.00 in the required prerequisite courses and the required 90 semester hours; however, a higher GPA is preferred and will result in the student being a more competitive applicant. Each required course must be passed with a grade of "C" or better. A grade of "C-" will not be accepted. Students searching for electives outside their major requirements should consider courses from the following areas: biology, chemistry, mathematics, sociology, psychology, business administration, healthcare management, and healthcare economics. See your advisor for suggestions. Students should be aware of prerequisites on all courses and plan their coursework accordingly.

Non-Academic Guidelines

There is no magic formula for acceptance in to professional school. Admission is based on GPA, test scores, shadowing and medical experiences, community involvement and volunteerism, leadership qualities, the interview, the essay, and letters of recommendation. Shadowing and medical experiences are of utmost importance. Students should plan to shadow a minimum of 40 hours in their selected profession. Health Sciences offers opportunities to meet these non-academic guidelines through the Shadowing Program, the Health Science Club, and volunteer experiences. Research experience is not required, but will be looked upon favorably. Students should plan to be involved in these types of activities and experiences throughout their undergraduate career. Other important non-academic factors include good moral character, excellent interpersonal skills, a deep commitment to healthcare, evidence of leadership potential and service to others.

The Application Process

Student will make application to each program individually. Additional information can be found on the program's website. Early application is encouraged. Students should make application in the summer or early fall of the calendar year proceeding the year in which they hope to enroll in professional school. Check with the schools to which you are applying to verify their policies and procedures regarding supplemental applications.

Letters of Evaluation/Recommendation

Letters of evaluation will be required of applicants. Letters from a faculty member, chiropractor, academic advisor, or employer would be appropriate. Information about the non-academic character of a student would be most useful as academic information is already in the application. Students should have their evaluation letters submitted directly through ChiroCAS if applicable.

Interviews

Most schools screen applicants with some form of personal interview. The format of the interview may vary depending on the schools to which you are applying.

Criminal Background Checks

Prerequisite for enrollment into any health science professional program is consent for an external background check. This check includes, but is not limited to, past criminal offenses and registry information. If there is evidence of arrest for a crime(s), conviction for a crime(s), presence on an abuse registry, or other information which reasonably suggests that patient safety might be compromised, the student will be asked to provide additional information.

Citizenship/International Students

Professional schools in the health sciences vary as to whether they accept non-U.S. citizens. Some schools that do accept non-citizens require a substantial financial commitment up front. Since not all schools accept non-citizens and since the financial commitment of those that do may be substantial, students should thoroughly research and carefully consider such a decision and discuss it with their pre-health advisors early in their undergraduate years.

3+3 Program Information

The 3+3 Bachelor of Science combined degree program between the University of Nebraska at Kearney and the chiropractic schools listed below was specifically developed for students who intend to pursue a chiropractic education. The program provides qualified students an opportunity to complete a Bachelor of Science in Applied Health Sciences degree and the Doctor of Chiropractic degree in only six years.

Participating Programs:

- Cleveland Chiropractic College**
- Logan University**
- Northwestern Health Sciences University – College of Chiropractic**
- Palmer College of Chiropractic**

UNK students are granted guaranteed acceptance after three years (90 credit hours) of pre-requisite coursework and completion of all requirements. Each program has a minimum GPA requirement in order to receive guaranteed admission. The first year of chiropractic coursework will fulfill the remaining senior level requirements at UNK. The student will then be awarded the Bachelor of Science in Health Science degree from UNK at the completion of the first year of professional study at chiropractic school.

Suggested Sequence of Key Courses

	Fall	Spring
Year 1	CHEM 160 MATH: See advisor for appropriate course placement.	CHEM 161
Year 2	CHEM 360 BIOL 225 (recommended)	CHEM 361 BIOL 226 (recommended)
Year 3	PHYS 205	PHYS 206
Year 4	Complete final major courses.	Complete final major courses.

- A minimum MATH ACT score of 22 or prior completion of College Algebra (MATH 102) or higher is a pre-requisite for CHEM 160.
- A minimum MATH ACT score of 20 or prior completion of College Algebra (MATH 102) (Grade of B+ or better) or higher is required for entry into PHYS 205.
- It is not recommended to take any of the above science courses during a summer session.
- Completion of one semester of chemistry is a pre-requisite for BIOL 225.

Students who are accepted into chiropractic school prior to completing a baccalaureate degree at UNK may be eligible to receive a Bachelor of Science degree in Applied Health Sciences if they have completed all general studies requirements and other graduation requirements as set forth in the UNK catalog and have at least 85 semester hours completed in pre-chiropractic studies.
