APPLYING FOR STUDENT TEACHING
RULES AND REGULATIONS
Rules and Regulations for Student Teaching

- Arranging a placement is highly inappropriate and prohibited. Visiting with potential schools is allowed, but not arranging a placement.

- Teacher candidates may not be assigned to a secondary school from which they graduated.

- Teacher candidates may not be assigned to a cooperating teacher who has taught the prospective teacher candidate as a student.

- Teach candidates may not student teach in any school building where they have relatives in attendance, such as children or siblings.

- Teacher candidates may not be assigned to any school building where a relative is currently employed.

- Teacher candidates may not student teach in any school district where a relative is a member of the School Board.
If a candidate requests a multi-building school district, please add a separate note to the application stating which buildings you cannot be placed in and why.

It is strongly encouraged that candidates NOT be employed during the student teaching semester

- The student teaching semester is the busiest time you have had yet. We realize some people must work while student teaching, but try to limit hours to weekends. You need to have enough time to keep up with the demands of student teaching.

- Once letters of request for placement are sent to the schools, candidates will NOT be able to change location requests. These requests are sent approximately 2 weeks after the application turn-in date. Exceptions to this will be considered only for serious circumstances.

- A candidate’s signature on the application means they agree to abide by these rules and regulations.
