Public health is the science and art of promoting and protecting the health of people and the communities where they live, work, and play. Public health practitioners, educators, and researchers work to prevent disease, prolong life, and promote health at the community and population level. Conversely, in the medical field, clinicians focus on treating illnesses and injuries one patient at a time. Schools of public health offer graduate programs in at least all five core areas of public health. These core areas of public health include:

- Biostatistics
- Environmental Health Sciences
- Epidemiology
- Health Policy and Management
- Social and Behavioral Sciences

The Pre-Public Health Program prepares students to pursue a Master’s Degree in Public Health (MPH) at the more than 100 accredited programs across the country, including the University of Nebraska Medical Center and Creighton University. Students interested in pursuing a master’s degree or graduate program in public health must have successfully completed a bachelor’s degree. Therefore, students pursuing a pre-public health curriculum are expected to choose a major so that they can be working towards a bachelor’s degree concurrently with the pre-public health program. Given the interdisciplinary nature of public health, a wide variety of majors provide appropriate preparation. A Minor in Public Health is available at UNK and can complement any major. The minor is not required as part of the Pre-Public Health Program but will provide a strong foundation of public health-related coursework.

**Requirements for Graduate Education in Public Health:**
Students should consult each school of public health they plan to apply to determine if there is specific coursework required for admission. These requirements may vary widely by degree type and/or concentration. Concentration areas that are quantitative in nature typically require specific math and science courses in areas such as statistics, calculus, biology, chemistry, and physics. Students should consult with their public health advisor regarding graduate admission requirements based on concentration area of interest.

**Recommended Courses:**
While many public health graduate programs do not have specific prerequisites, the following courses may assist students in gaining a background in public health areas of study. This is not an all-inclusive list, as many other classes also exist that have relevant information for public health. Some of these classes may have prerequisites. Please consult your pre-public health advisor for recommendations based on your area(s) of interest.

- **BIOL 110** Introduction of Epidemiology (3 hours)
- **HSCI 140** Introduction to Public Health (3 hours)
- **HSCI 320** Global Health (3 hours)
- **MGT 450** Population Health Management: Systems and Policies (3 hours)
- **PE 329** Introduction to Health Promotions (3 hours)

One of the following courses in statistics is recommended:

- **BIOL 305** Biostatistics (3 hours)
- **MGT 233** Business Statistics (3 hours)
- **PSY 250** Behavioral Statistics (3 hours)
- **STAT 241** Elementary Statistics (3 hours)

**Other Recommended Electives:**

- **BIOL 102** Environmental Biology (3 hours)
- **BIOL 211** Human Microbiology (4 hours)
- **BIOL 215** Human Physiology (4 hours)
BIOL 440  Infectious Disease (3 hours)
BIOL 461  Human Genetics (3 hours)
CHEM 145  Introduction to Chemistry (4 hours)
CHEM 148  Introductory Chemistry for the Health Sciences (4 hours)
FAMS 150  Lifespan Development and the Family (3 hours)
FAMS 351  Marriage and Family Relationships (3 hours)
FAMS 481  Cross-Cultural Family Patterns (3 hours)
GEOG 305  Environmental Conservation (3 hours)
GEOG 309  Climatology (3 hours)
GEOG 417  GIScience Principles and Concepts (4 hours)
HIST 110  History of Science and Medicine (3 hours)
HIST 305  History of Global Health (3 hours)
PE 108  Nutrition (3 hours)
PE 150  Healthy Wealthy and Wise (3 hours)
PHYS 203  Physics for Allied Health (4 hours)
PSY 231  Abnormal Behavior and Society (3 hours)
PSY 440  Health Psychology (3 hours)
PSY 462  Adult Development and Aging (3 hours)
SFED 335  General Safety Education (3 hours)
SFED 435  Occupation Safety/Health (3 hours)
SOC 275  Social Psychology (3 hours)
SOC 462  Sociology of Health and Illness (3 hours)
SOWK 170  Introduction to Social Welfare (3 hours)
SPAN 103  Spanish for Special Purpose – Medical Professionals (3 hours)
SPCH 435  Introduction to Health Communications (3 hours)

Beyond Academics:
Pre-Public Health students are encouraged to participate in experiences, such as leadership roles, volunteer work, research, and shadowing, which will help them prepare for public health school and the various professions in public health. Activities outside the classroom play a significant role in a student’s application to a professional school program. Such experiences demonstrate a commitment to and knowledge about the profession. In particular, working or volunteering at a hospital/clinic, health department, health related organizations, or non-profit involved in public health advocacy or policy would be helpful to learn about the different professions in public health. Students pursuing a career in public health should recognize how these professions differ from a clinical practitioner like a physician, nurse, etc.

Application and Admission:
For admission to UNMC College of Public Health’s MPH or PhD programs, students must apply through the centralized application process – SOPHAS. Information on SOPHAS can be found at https://sophas.org. Students pursuing an MS in Emergency Preparedness or any of the Certificate Programs apply directly to UNMC for admission. Detailed information on this process can be located at http://unmc.edu/publichealth/admissions/index.html. Applicants will be assessed on the following: review grade point average, recommendations (when appropriate), knowledge of profession, service, and leadership experience. Interviews are part of the application process for doctoral level programs.
