Level I and Level II Training Available On-line

The Nebraska Safety Center will be providing on-line Level I and Level II training to replace “in person” Level I and Level II trainings suspended in response to the impact of COVID-19. Once the COVID-19 Directed Health Measures have been lifted statewide, the ‘in-person’ trainings will again be offered as an option. Register for these classes at https://nepupiltransportation.com/ Contact the Nebraska Safety Center for more information. (Contact information below.)

Level II Training Extension for Drivers Unable to Access Online Training

All pupil transportation drivers are expected to use the on-line training going forward and employers are urged to make this technology available to their drivers. However, we recognize there may be health issues making the on-line training impractical. In these situations, the Nebraska Department of Education will freeze the 60-day window for level II training going forward. The freeze of the 60-day window will end when actual classroom Level II trainings begin again and only allows a driver to take the Level II course instead having to take the Level I course. To qualify for the additional 60-day window, a waiver will need to be obtained from the Nebraska Safety Center and signed by both the driver and the driver’s employer.

The freeze is in place for those unable to take the online Level II training and who cannot take the classroom training due to COVID-19 related circumstances only. Please note that the additional 60-day window does NOT allow drivers to transport students until their Level II training is up to date.
